

FAST PARK

A RAPID INSTALL SOLAR CANOPY

The FAST Park is designed to enable 2-day installation. The canopy's rapid installation method reduces project complexity which increases the overall completion speed for installers, and practically no site disruption for customers. The result is happier site owners and more profitable installations.

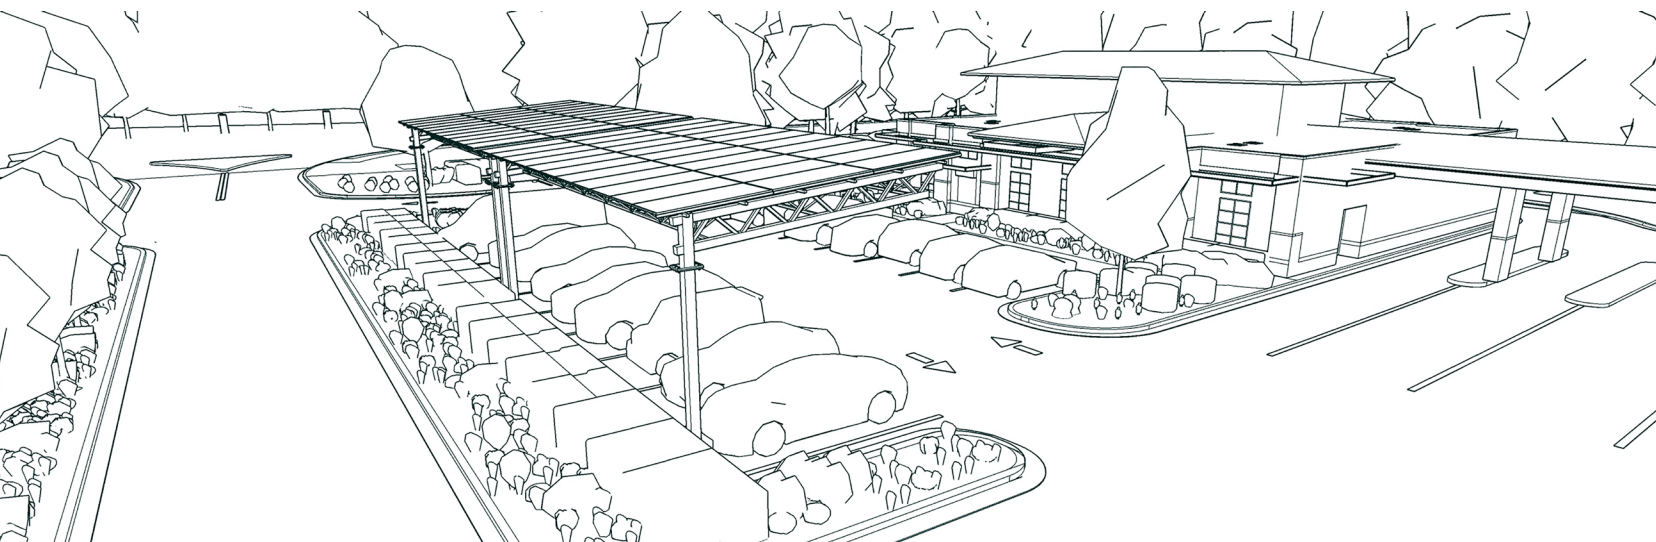

The FAST Park is a modular L-design solar canopy unit and a true plug-and-play solution. The units ship complete with racking, panels, and inverter, vastly simplifying design and procurement. Each canopy produces 21.24kW and has a configuration of three panels by twelve panels in portrait configuration, with overall dimensions of approximately 20' by 40'.

Unlike traditional solar canopies, 90% of Quest's construction takes place on the ground, inclusive of module and inverter wiring. After ground assembly, electrical and lighting, the canopies are lifted by telehandler for final installation, minimizing overhead work and optimizing worksite safety. The mechanical and electrical workers get a safer construction environment. Reduced on-site time results in reduced construction costs, increased labor throughput, and limited disruption to parking lot operations.

TURNKEY INSTALLATION

**MODULAR SOLAR
CANOPY UNITS**

**80% CONSTRUCTION
OFF-SITE IF DESIRED**

TECHNICAL SPECIFICATIONS

Length	45'
Width	25'
Max Clearance	13.5'
Span between foundations	45'
Total Foundations	2
Module count	36
DC Nameplate	21.24kW
Panels	Q.Cells Q.Peak Duo XL - G11S-590W
Inverter	CPS 25K (or comparable)

OPTIONAL PACKAGES

Wiring Harness
Lighting Package
Water Management

INSTALLATION SUPPORT

Structural plan sets
Staging and pick plans
Stamping services in 50 states
Turnkey delivery

FEATURES AND BENEFITS

Pre-fabricated engineered canopy	Allows you to close projects quickly
Build on ground/lift into place	Allows you to improve construction productivity
Modular design	Allows you to customize your project size in 21.24kW increments
Only 2 foundations	Allows you to simplify ground attachment

MISC

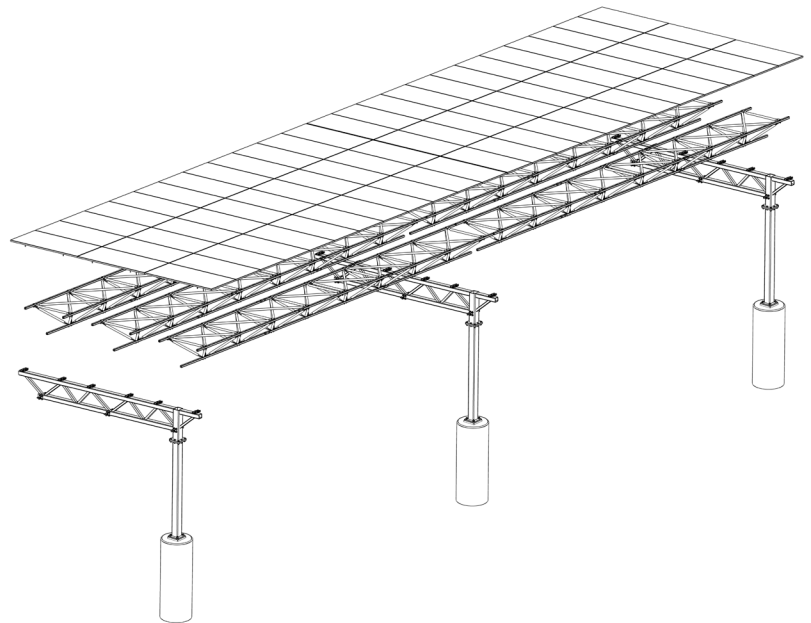

Standard Warranty	10-year
-------------------	---------

The details contained in this document are estimates based on our experience. If you have a specific contract in mind, please contact us for customized technical specifications.

Quest Canopies partners with our customers to create highly aesthetic solar racking solutions that maximize project performance, eliminate waste, and allow entry into new markets.

Our commitment to optimizing the total installation process results in more satisfied developers, contractors, and site owners.
